

Orthotic Product Catalogue

Blatchford Patient Solutions offer a wide range of high-quality stock products to meet a variety of clinical pathways and patient expectations. By combining clinical expertise with innovative stock products, we have developed several strong working partnerships with UK and international companies to ensure we provide the best rehabilitation and mobility solutions. Our goal is to deliver excellence in service, delivery, quality, and cost via the products we distribute in the UK Orthotic market.

In addition to this our team of highly skilled technicians manufacture modular and custom devices to ensure optimal benefit to the user. Our specialisations include orthotic devices for diabetes, neurological disorders, orthopaedics, and spinal pathologies. We also offer modular and custom orthopaedic footwear from paediatric to geriatric provision.

Ordering Information

1. Ordering:

Ordering products from Blatchford is simple and easy. You can contact our Customer Services directly:

Telephone: +44 (0) 114 2637900

Email: orthoticscs@blatchford.co.uk

Facsimile: +44 (0) 114 2637901

Post: Blatchford Limited, 11 Atlas Way, Atlas North, Sheffield, S4 7QQ.

2. Delivery Promise:

Our goal is to provide a fast and efficient delivery. Therefore our aim is to despatch all orders for internal stock products, received by 2pm Monday to Thursday and by 11am on Fridays, on the day the order is received. This does not apply where specific delivery schedules have been previously agreed and is subject to stock availability.

3. Single Patient Use

All products prescribed/distributed by Blatchford are for single patient use only and should be fitted by a qualified health care professional. The re-use of any product can potentially cause harm to the user and will invalidate the CE or any warranty agreement.

All user mass, activity levels and load bearing are stipulated according to the manufacturer's IFU.

Some products in the catalogue may contain leather, please refer to the manufacturer's IFU.

4. Warranty

All products are covered by a manufacturer's warranty please refer to the product IFU or contact a member of our customer service team. All products supplied by Blatchford conform to MDD or MDR regulations.

5. Catalogues/Product Information:

If you require additional product information please contact our customer service advisors who will be happy to help with your enquiry.

6. Delivery Charges for Mainland UK

Standard delivery time = next working day by 5.30pm £7.50. N.B. Standard delivery charges are per order not per item.

All delivery charges are + VAT.

These charges do not apply where prior agreement has been made in respect of delivery.

7. Shortages/Damaged Goods:

If any items are received damaged or there are shortages in the delivery this must be notified to customer services within 5 days of receipt of goods.

8. Blatchford Returns Policy:

In the event of a product being returned for credit this must be done within 30 days of receipt.

In the event a product has been supplied faulty or incorrectly our customer service team need to be notified within 5 working days of receipt so that replacement goods can be despatched or processed for credit.

We are happy to accept 'stock products' that are returned for credit if they are not suitable for the patient. For items to be accepted for credit the following conditions apply:

- The product must not have been adapted
- Are returned in the original packaging and not defaced
- Are in a re-saleable condition and unworn

Blatchford reserves the right to reject items returned for credit if the above conditions are not met. Blatchford are unable to accept return of items that are 'made to order' for credit, unless the goods are faulty, or it can be demonstrated they have been damaged in transit.

All items being returned for credit must be received within 30 days in accordance with the above return's conditions.

Please note items not stocked by Blatchford may take up to 7 days to be replaced.

Products & prices are subject to variation at any time and are subject to availability. E & OE.

If you need more information, please contact our customer service depart on 01142637900 or emailorthoticscs@blatchford.co.uk

9. Bespoke Custom Manufacturing Service

In addition to our comprehensive stock range, we also manufacture a wide range of fully bespoke solutions using the latest CAD-CAM and 3D printing technologies, to complement this we also use traditional hand skills.

All our bespoke products are manufactured in the UK at our Central Orthotic manufacturing facility in Sheffield.

Bespoke products include:

- Helmets
- AFOs
- KAFOs
- Spinal Bracing
- Cervical
- Insoles
- Bespoke/Modular Footwear
- Footwear adaption/repair

If you have any questions regarding the products in this brochure please contact Customer Services on +44 (0) 114 2637900 or alternatively email orthoticscs@blatchford.co.uk

Turtlebrace

All you need in a brace - visit turtlebrace.com

The original Turtlebrace prototype was first developed in 2015. The quality and efficiency of the product were quickly recognised, leading to industry demand that transformed the prototype into a company, which was officially founded in 2017.

Turtlebrace are dedicated to creating, optimising and producing high quality products that meet the needs of the health professional and the patient's quality of life. Their products are sold throughout four continents.

Product Features and Benefits

- Supports and enables rehab protocol - doesn't limit it
- The only brace available that fits newborn up to adults
- 100% made in North America
- Cares for the environment - uses minimal packaging
- Licensed health Canada manufacturer
- Direct molding on the limb
- Antibacterial fabric
- Radio-transparent
- Submersible and auto-draining
- Remoldable without limits nor degradation
- 3.2 mm thickness that permits normal dressing
- Compostable eco-friendly plastic

3 Simple Steps for Use

1. Heat the brace (dry heat or hot water), until it becomes soft and elastic.

Dry heat method

Put the brace in either the Turtlebrace heating bag, a regular or convection oven, between 67°C and 108°C (152°F and 225°F).

Hot water method

Place the brace in a hot-water heating pan, between 67 °C and 100°C (152°F and 212°F)

2. Once the brace has become soft and elastic, you can drape the brace on the body. Make sure that the temperature of the brace is not too hot for comfort or at risk of burning your patient.

3. Place your patient in the desired position and wait for the brace to harden.

Turtlebrace Baby

- 'Apply and forget' type brace made of a stratification of multi-perforated low-temperature thermoplastic and microfibre fabric
- Flexibility of components stabilises joint more easily and precisely than a traditional brace or cast
- Can be reshaped multiple times, without losing its qualities - allows adjustment due to swelling or morphological changes

Turtlebrace Baby

Age/Size	Product Code	Calf Circumference	Ankle Circumference	Height

XTERN: The New Revolutionary Foot Drop AFO

Designed in Canada • Assembled in the UK • Distributed by Blatchford

No skin contact

Exoskeleton design fits onto the outside of the shoe without touching the foot or the ankle.

Adaptable

Easily conforms to uneven ground and slopes.

Lightweight, sleek design

Made of highly durable thermoplastic that makes it feel weightless.

Versatile

Goes from shoe to shoe in 5 seconds. Fits majority of shoes.

Symmetrical design

Fits both the left and right feet.

Amazing energy return

Patented design makes it easy to position yourself, as well as invert or evert the foot as required.

Foot and Ankle

Flensberg Available direct from UK stock

Features

- Asymmetric, spacious diabetic shoe
- Available in standard and wide fittings
- Dorsal zip allows donning and doffing without using the hook and loop fasteners.
- Integrated toe cap for additional stability and protection
- 30mm thick, rigid and extra strong rocker bottom sole with pitch prevents flexion of the metatarsophalangeal joints, ensuring the patient's foot is stabilised and immobilised
- Each shoe is supplied with three 5mm thick EVA insoles (STANDARD FO0053-XX and WIDE FO0054-XX). The top insole has an antimicrobial coating. The insoles can be used as an interim solution for pressure relief until being replaced with a diabetic foot orthotic.

Nürnberg Available direct from UK stock

Features

- Asymmetric, spacious diabetic shoe
- Available in standard and wide fittings
- The firm outer fabric can be separated from the soft inner fabric to avoid possible pressure points
- 30mm thick, rigid and extra strong rocker bottom sole with pitch prevents flexion of the metatarsophalangeal joints, ensuring the patient's foot is stabilised and immobilised
- Supplied with a cutting template but without insoles. If insoles are required please see insole sets on page 18.

mouldable & grindable TPU

LGB Medical Bio-Fusion

- TPU offers excellent elasticity, allowing it to return to its original shape after deformation
- Enhanced shock absorption, providing better comfort and performance from heel to toe
- Highly resistant to wear and cracking, even under repeated stress
- Ensures a longer lifespan for orthotic devices subjected to daily use
- Lightweight and flexible
- Adapts to subtle variations in foot shape, improving fit and reducing discomfort
- Easily heat moulded and can be remoulded multiple times without significant degradation
- Allows for repeated adjustments, ideal for evolving orthotic needs
- Largely recyclable and biodegradable, reducing environmental impact at the end of its lifecycle
- Suitable for creating both flexible and semi-rigid orthotics, catering to various patient needs
- Combines lightweight properties with enhanced cushioning, contributing to better patient mobility and reduced fatigue

4 Degree Medial Rearfoot

Ideal for mild biomechanical corrections.

6 Degree Medial Rearfoot

Ideal for patients requiring additional support to control pronation

Algeos Interpod Insole Range

- Thin, light, slim fit for comfort in all shoes
- Available in 3 arch heights
- Self-adhesive, full length top cover and 3/4 length cover included in the pack as standard:
 - High quality 3mm EVA used
 - Quick return foam base
 - Removable first ray addition (full length only)
 - Easy to adhere additions

1st Ray Cut

Aids the 1st Ray to Plantar flex, consequently enhancing the Windlass Mechanism.

Cuboid Notch

Aids the 1st Ray to Plantar flex, consequently enhancing the Windlass Mechanism.

The Plantar Facial Groove

Decreases arch irritation.

Rear Foot Wedge

Offloads the medial column to facilitate Windlass.

Inverts rear foot; improves biomechanical need for otherwise excessive arch height.

Algeos Interpod Flex 3/4 Length 4° Insole

- Eliminates pronation moments about the subtalar joint created by the lateral heel cup
- Lightweight and easy fitting
- Cuboid notch
- Plantar fascial groove reduces arch irritation
- Made from durable polypropylene
- Heat mouldable

- Available in two variants: ToeOFF® AFO 2 - 12-15mm heel height with full toe lift
ToeOFF® AFO 2.5 - 7mm heel height with less toe lift

Allard ToeOFF® AFO 2.5 Flow

- For your active patients or others who require less resistance or more ROM.
- The new FLOW technology offers a smoother transition (flow) throughout the gait cycle and has increased ROM in the sagittal plane.
- ToeOFF® Flow 2½ has a lower heel height (approx. 7mm) which accommodates gentler contours of shoe insoles and offers more clearance for the forefoot in the shoe.

Allard Ypsilon® Flow ½ AFO

- Designed for active patients or others who require less resistance or more flexibility.
- Adapts and moves with the lower leg with less resistance to ground reaction forces
- Proximal ends of the 'Y' provide fixation points, eliminating pressure on the tibia crest
- 7mm heel height
- Also available in paediatric sizing, see page 151

Allard SoftKIT 2.0™

- Every ToeOFF® 2.0 should have a soft interface between the orthosis and the tibial crest. SoftKIT 2.0 is a padding system that includes two narrow neoprene pads to create a pressure-free channel to help relieve any potential discomfort from bony prominences. The kit includes pre-cut pressure-sensitive MikroFIX tabs to easily affix the pad to ToeOFF® 2.0. An extra pad is included, so one can be worn while the other is laundered.

Ossur Exoform Dorsal Night Splint

- Adjustable aluminum stay inside dorsal shell allows modification in the angle of dorsiflexion
- Soft, overmolded edges enhance comfort
- Hinged shell at the calf area prevents brace rotation
- Semi-rigid plantar pad reduces discomfort along the sides of the foot while providing an improved angle of dorsiflexion
- Non-slip surface on plantar pad prevents slipping during normal walking
- Circumferential heel and posterior strapping prevents migration while increasing overall comfort and effectiveness
- Strapping and shell perforations improve comfort and breathability

Exoform Dorsal Night Splint

Thuasne Action Reliever

- Semi-soft OA knee brace
- Dynamic off-loading provided by the straps and the combined rigid adjustable hinge on the affected side/flexible stay on the unaffected side
- The Action Reliever has a unique off-loading action utilising straps to create a dynamic 3-point pressure system that is most effective on heel strike
- Invisible under most clothes
- Anatomical knit with integrated anti-slip silicone, comfort zone at popliteal crease and stretch knit at the edges
- Easy to close thanks to the effortless magnetic buckles with finger loop
- Two models available for both medial or lateral OA: right medial/left lateral and left medial/right lateral

THUASNE

Thuasne Rebel® Reliever Knee Brace

- Knee offloading: adjustable 3-point leverage system (Load-shifter technology) with up to 9° in varus or valgus
- Clinically proven efficacy
- Ligament stabilisation: rigid frame with TM5+ hinge that reproduces the natural movement of the knee
- Motion control: adjustment of extension (from 0° to 40°) and flexion (from 0° to 90°) with a tool-less system
- Hold: synergistic suspension strap, tibia bolster to avoid rotation, C/S (Compression/Suspension) package to enhance support by preventing slipping
- Comfort: interior padding and condylar pads in foam
- Ease of application: buckles and tool-less offloading setting (Snap Lock).

Allard CROSS™ Knee Brace

- Semi-rigid knee orthosis, designed to function together with an Allard AFO
- Easy to don and doff with one hand
- Strategically placed silicone band to prevent migration
- Reinforcement in the upper wide cuff keeps the orthosis open so the foot and leg slide easily into the brace - aids users with limited function
- Adjustable ROM stops - flexion: 45, 60, 75, 90 degrees and extension: 0, 10, 20, 30, 40 degrees

Ossur Unloader One®

Unloader One® is designed to relieve osteoarthritis knee pain and wearing it may help improve mobility. It features Össur's unique, patented 3-point leverage system, which combines a single hinge with dual Dynamic Force System (DFS) straps to provide unloading of the knee joint. Clinical studies demonstrate that this system may relieve osteoarthritis knee pain and improve function and quality of life while being worn. Colour-coded Quick Fit buckles make donning and doffing simple, while flexible shells and breathable liners are designed to improve comfort and reduce migration, thus helping to ensure compliance.

- Dual Dynamic Force Straps® designed to reduce pressure on sensitive bony surfaces of the knee, resulting in reduction of pain
- Lightweight frame, perforated for flexibility and ventilation, with flexible, low profile upright that contours to patient anatomy and allows use underneath clothing
- Tool-free SmartDosing® dial enables fine-tuned pain management and can be adjusted even when wearing the brace under clothing
- Colour-coded quick fit buckles enable easy application and removal
- Proprietary Sensil® silicone liners designed to reduce migration
- Available in standard and short version, for a perfect fit on shorter legs

Standard version is recommended for patients above 1.65m. Short version is recommended for patients under 1.65m tall. Hinge is placed on the side of the affected compartment

Circumference measurement: 15cm below mid-patella.

Ossur Unloader One Plus®

Many sufferers of OA knee pain are overweight. For these patients, containing excess soft tissue is essential for comfortable and effective bracing. That's why our new Unloader One Plus® model features a wider thigh strap than the standard version, plus a gastroc strap that helps secure the brace in place. And because bigger legs require more support, we included a sturdier upright with an Adjustable Dynamic Joint, enabling additional leverage for optimal pain management. Multiple, peer-reviewed clinical and biomechanical studies have proven the efficacy of this technology.

- 3-Point Leverage System provides clinically relevant pain relief of affected compartment
- Single SmartDosing dial allows fine-tuned pain management
- Helps keep patients mobile during daily activities
- Discreet hinge and sleeve design ensure a snug fit underneath clothing
- Lightweight and easy to use

Standard version is recommended for patients between 1.65 and 1.92 metres tall.

Ossur Unloader One® X

Unloader One X improves mobility by providing pain relief from knee osteoarthritis and degenerative meniscal tears.

- 3-Point Leverage System consisting of two Dynamic Force System (DFS) Straps, rigid shells and a single upright hinge contribute to a unicompartamental unloading of the knee joint
- Unloading effective only when needed, no condyle pressure during sitting or swing phase
- Slender, perforated frame with soft edges, which contours easily and remains discreet
- Skin-friendly liners, pads and smooth inner surface reduce likelihood of pressure points
- Gastroc strap is positioned over the thickest part of calf to help prevent slippin.
- Tool-free SmartDosing® dials enable the patient to be in control of their pain level by fine-tuning the strap tension
- Colour coded touchpoints and Quick-Fit buckles make it easy to use
- Alignment guide on hinge facilitates correct positioning on the leg
- Entire brace is machine washable (washbag included with product)

Easy Application & Removal
Proprietary one-step closure system for easy donning doffing.

Advanced Aerospace Grade Aluminium
Provides stability and support for ligament issues such as ACL, PCL and combined instabilities.

Dual Strut Design
Provides increased stability.

Flexion/Extension Adjustments
Easily control the allowed range of motion.

Promedics Ascender® Telescopic ROM Knee Brace

Available direct from Sheffield stock

- Universal sizing
- Maximum strength, minimum weight
- High grade anodised aluminium
- Length range 44 cm - 70 cm
- 5 drop lock settings
- Quick-clip range of motion settings
- Available with foam pads

GENURANGE

Promedics Genurange Universal

- To reduce stock-holding of different circumferences, the one size Universal wraps can be cut, without fraying, to fit most sizes
- Open-cell padding tibial and femoral liners are attached by four or six straps for an excellent fit
- Hinges, applied to the liners, align with the tibial condyles and the liners can be removed for replacement or laundering
- Available in four lengths
- Replacement wraps and straps available, see below

Genurange Universal

Size	Product Code	Length
Small	GN/0510/18	45cm
Medium	GN/0510/20	50cm
Large	GN/0510/22	55cm
Extra Large	GN/0510/24	60cm

Replacement Liners and Straps

Size	Product Code
Small	GNW/0510/18
Medium	GNW/0510/20
Large	GNW/0510/22
Extra Large	GNW/0510/24

Genurange hinges feature:

- A geared, polycentric hinge which mimics the action of the knee
- Four small pins which are inserted into apertures to set the hinge at the required angles of flexion and extension, between 10° and 110°
- A plastic hinge cover, with screw closure, to prevent patients tampering with the hinge mechanism
- Features plastic tags to prevent loss of pins

Promedics Genurehab

- The 40cm Genurehab is a short version of the Genurange Universal
- Designed for long term support and motion control during the more active phase of recovery
- The one-size Genurehab wraps can be cut without fraying, to fit most sizes
- To order replacement liners and straps, add 'W' after 'GN' in the code, e.g. GNW/0310

Genurehab

Product Code	Size
GN/0310	Universal

Promedics Genurange Lite

- A 'lite' wrap-around knee brace with ROM hinges
- 3D spacer fabric with open mesh posterior panel makes this a supportive, comfortable well fitting brace
- Suitable for the treatment various knee conditions including mild/moderate collateral ligament injuries and cruciate mild instability of the cruciate ligaments

Genurange Lite

Breathable, comfortable and skin friendly.

Moisture-transporting material

The unique AirX™ fabric has the ability to transport moisture efficiently away from the body. The layering of fibre structures promotes a moisture wicking process, which results in a dry comfortable feeling to the surface of the skin so that body always feels fresh and dry. AirX™ gives the body optimal freedom to breathe – reduces the risk of skin maceration which results in improved patient compliance.

A pleasant surprise

It is hard not to be impressed. AirX™ is made of a soft, lightweight material that perfectly follows the contours of the body. This means that AirX™ adapts itself perfectly to the body so that it feels extremely comfortable to wear – even for long periods at a time – a feature, which is often a problem with orthopaedic and sport medical braces and supports. In this way, AirX™ is a comfortable material that helps to increased patient compliance without you even knowing!

Promedics Air X SK Knee Brace

- The industry leading wrap-around knee brace for many years
- Easy to use, comfortable brace for the treatment of mediolateral instability
- Incorporates the excellent properties of AirX 3D spacer fabric
- AirX gives great compression, support, and a high degree of breathability and reduction in moisture
- Enhances comfort for extended periods of time and improves patient compliance

Promedics Buttress Knee Sleeve

- A standard Neoprene knee sleeve with open patella, incorporating a buttress pad
- Can be selected with a buttress pad to oppose medial/lateral patella migration
- Buttress pad positions defined as viewed by the patient, e.g. left buttress pad gives lateral support to the left leg and medial support to the right leg
- Full buttress also available

Hip

Brace Orthopaedic DynaCox Evolution™ Hip Brace

- A functional combination of orthosis and bandage, this close fitting orthosis offers a controlled range of movement
- Helps maintain containment of the hip by use of counter-forces, generated by pre tensioned design. Lateral side bar constructed at an abduction angle of 20°, so when the patient works against this force by adducting and flexing, the brace responds with a counter force through the femoral pad to give the containment required
- Bandage provides compression and helps reduce excessive flexion of the hip
- Significantly reduces the risk of dislocation, whilst allowing normal muscle action

Restorative Medical RestAir Hip

- Comfortably and safely treats hip adduction and scissoring
- RestAir technology uses 4 air bladders (2 on each side) to redistribute skin pressure and gradually increase the hip's range of motion
- Wide cuff straps provide comfort, increasing likelihood of patient compliance
- Spreader Bar Assembly with 3 choices of abductor-bar length provides greater hip abduction when needed
- Flex Technology orthosis moves with the patient's abnormal muscle tone and spasticity for comfort and helps to relax the tone
- Hand-bulb air pump included

Buchanan Orthotics Dictus HIP-Foot & HIP-Knee

- Dictus Hip gives power to the leg in the swing phase and thus a better gait
- Provides direct feedback on results
- Can be used over regular clothing or under loose clothing
- Can be used on one or both legs and is universal
- Available in two models: HIP-Knee and HIP-Foot
- Dictus Hip-Foot consists of a comfortable hip belt and elastic rubber band with knee band that is attached to the foot part. The rubber bands assist with hip flexion. The level and pulling direction of the assistance can be easily set according to the user's needs, easy to change the pulling direction of flexion, adduction, inward rotation. If Dictus HIP-Foot is used, the foot inversion can also be corrected.
- Dictus Hip-Knee consists of a comfortable hip belt and elastic rubber band that is attached to the thigh.

Thuasne Ligaflex® Rhizo Thumb Splint

The Ligaflex Rhizo is a thumb spica that immobilises the thumb in a painless position by a patented wire frame in the thumb web space. An opening in the thumb column prevents any pressure on the painful zone. Particularly suitable for basal thumb arthritis. The anti-bacterial 3D knit is lightweight and breathable for effective moisture wicking. The Ligaflex Classic Open is ambidextrous.

LIGHT TO MODERATE SPRAIN

Promedics Pollo Form Spica - Standard

- Unique two-way stretch material gives the Pollo Form excellent properties for supporting the wrist and thumb
- Outer material is durable and supports an inner pocket with a pre-cut low temperature thermoplastic insert
 - The insert is activated by pouring warm water into the pocket
 - After removing the water the brace is then fitted to the patient whilst forming the insert to hold the thumb in the required position
 - The insert can be reactivated to allow serial adjustments or removed later in the treatment programme
- The Long version gives greater control around the wrist

Procool

Procool is a range of lightweight and breathable splints producing excellent compression and support for a wide range of conditions and injuries. Made with tiny perforations in the Neoprene for comfortable wear and a terry cloth lining that feels good against the skin. Procool offers you just the fit you want - excellent stability without excessive bulk.

Breathable, comfortable and skin friendly.

Moisture-transporting material

The unique AirX™ fabric has the ability to transport moisture efficiently away from the body. The layering of fibre structures promotes a moisture wicking process, which results in a dry comfortable feeling to the surface of the skin so that body always feels fresh and dry. AirX™ gives the body optimal freedom to breathe – reduces the risk of skin maceration which results in improved patient compliance.

A pleasant surprise

It is hard not to be impressed. AirX™ is made of a soft, lightweight material that perfectly follows the contours of the body. This means that AirX™ adapts itself perfectly to the body so that it feels extremely comfortable to wear – even for long periods at a time – a feature, which is often a problem with orthopaedic and sport medical braces and supports. In this way, AirX™ is a comfortable material that helps to to increased patient compliance without you even knowing!

Promedics Air X Thumb Spica

- Adjustable thumb Spica offering support around the wrist, MCP and CMC joints
- AirX offers improved properties
- Breathable
- Vapour transfer for reduced moisture
- Skin friendly
- Comfort, compression and conforms

Promedics Functional Resting Splint

- A functional resting splint that available in two options:
 - **Full Padded Cover:** Preformed plastic shell with fully removable padded cover and comfortable wide closure straps. Ideal for patients using the splint on a longer term basis and the fully padded cover offers excellent comfort and compliance to those patients that are very sensitive
 - **Easy Liner:** Preformed plastic shell with a towel liner that is attached using hook and loop tabs. Supplied with two towel lined padded liners that can be easily removed and replaced. Removable straps can be positioned as required. This option is more suited to conditions that benefit from easily changeable liners such as burns or trauma and is also a lower cost option

Promedics Aspen VRTX TLSO

- Intuitive and specialised design for efficient support within the thoracolumbar spine
- Innovative brace that delivers appropriate motion restriction throughout the healing process.
- Simplified two piece bivalved design allows for clinicians to apply the brace in a supine position reducing the amount of patient log rolling.
- Improved under arms straps provide optimal stabilisation and comfort.
- This one size fits most brace utilises built in side panels that extend to fit a wide variety of patient anatomies. This key feature assists in reducing part inventory for clinics.

AMI Medical Suportx™ Easy Peel Belt

- 15cm, 20cm or 26cm belt depth
- Suportx™ unique fastening system
- Supports abdominal muscles, helping to prevent herniation
- Suitable for all-day wear, allowing unrestricted movement for physical activity
- Reduces the appearance of stoma pouches and hernias, smoothing out the shape of the body without restricting the natural output of the stoma
- Simple application allows the belt to be put on whilst standing up or lying down
- Adjustable fastening provides a choice of support level
- Release pressure easily with the belt's double attachment feature
- Visits to public restrooms become easier, as the stoma pouch can be changed without fully removing the belt
- Made using mouldable technology and soft, comfortable material
- Anti-roll elastic ensures waistband stays in desired place throughout the day

AMI Medical Suportx™ Shield Belt

- Shield Belt and Stoma Shield conveniently come together in a pack
- Allows the stoma to function without restriction
- Provides additional protection when taking part in physical activities
- Helps to contain prolapsed stomas
- Allows the user to wear trouser belts with a stoma
- Minimises risk of injury to the stoma
- Compatible with both one-piece and two-piece stoma bags
- Applies pressure to the stoma site, therefore reducing discomfort
- Applies pressure to the stoma bag, stopping leakage at the seal or hindering the function of the stoma

How to measure for AMI Medical Suportx™ Easy Peel or Shield Belt

Measuring the size of Easy Peel Belt

Take a tight measurement around the widest part of the body where the belt is to be worn/support is needed. This is normally over the hernia/stoma

Measuring the depth of Easy Peel Belt

The top of the belt needs to be positioned 3cms above the top of the stoma/hernia. Measure vertically to determine the depth of the belt required. It should fully cover the hernia/abdomen area without digging into groin/legs.

AMI Medical Suportx™ Easy Peel and Shield Belt Sizing

Size	Centimetres	Inches
S	75-90	30-36
M	90-105	36-42
L	105-120	42-48
XL	120-135	48-54
XXL	135-148	59-64

Maternity

Promedics Maternity Belt Style B

Cervical

Aspen Vista II CTLSO

- Features an innovative symmetrical back panel that integrates with the VRTX CTLSO for a cervical to sacrum solution
- Specialised anterior tightening adjustments allow for more efficient clinician application
- Easy multistep cervical and sternal adjustability
- Optimal motion restriction
- Comfort without compromising care
- Supports progression of care
- Aspen's flagship padding
- Flexible thoracic adjustment
- Locking sternal adjustment
- Modular treatment
- Two piece design

Aspen Vista II CTLSO

Product Code	Size	Measurements
984690	Extra Small	66 - 91.5cm
984680	Standard	78.7 - 152.4cm
984700	Extra Large	129.5 - 177.8cm

This comprehensive off the-shelf cervical to sacrum solution enhances the overall efficiency of hospital operations.

Anterior Panel Height

Posterior Panel Height

Symmetrical Back Panel

The Vista II collar features an innovative symmetrical back panel that streamlines fitting and reduces the risk of incorrect patient application. The symmetrical posterior panel serves as a visual cue, ensuring that the collar is applied accurately and securely.

Connecting Straps

Adjustable straps easily connects the Vista II collar with the Vista II CTLSO upgrade kit for multilevel spinal support.

Cervical and Sternal Adjustability

Easy multi step cervical and sternal adjustability allows clinician to provide the care and comfort needed for the patient.

Promedics Aspen Vista® Collar Available direct from Sheffield stock

- Incorporates six sizes in one collar
- Extra large patient access window

Brace Orthopaedic Paediatric CDS® Ankle Brace (360° Hinge)

- Precise height adjustment of hinge position for exact alignment with the anatomical joint axis
- Sole plate with double rocker allows limited indoor mobility
- Adjustable foot rotation between -5° and +5°
- Improved positioning of instep and heel strap
- Individual adjustment of the spring tension, which can be switched on and off without tools and without varying the set spring tension
- Variable adjustment of the correction range in dorsiflexion
- Individual adjustment of shells in position and shape
- High wearing comfort due to air-permeable, light-weight fabric shells

Allard KiddieFLOW®

- KiddieFLOW™ is more flexible in the heel and toe area of the footplate than KiddieGAIT® and allows a greater range of motion
- Supports the dorsiflexion of the foot in the swing phase, provides better control of foot positioning in the late swing phase, which in turn improves stability in the stance phase
- Softer foot blade provides easier roll off at the end of the stance phase
- Can also be combined with individual insoles or SMO

Allard SureStep Go SMO

- A prefabricated SMO, designed to manage mild to severe pronation associated with hypotonia
- Uses circumferential compression to stabilise the foot and ankle
- Open heel allows more of the foot to “feel the floor”, which aids in sensory input and posture
- For maximum function, always wear with suitable footwear
- Highly recommended to be used together with KiddieFLOW™, KiddieGAIT® or KiddieROCKER®

Cascade DAFO JumpStart® Bunny®

- High proximal “ears” provide additional medial/lateral control
- Proximal posterior elastic strap adds to frontal plane control and offers mild resistance to excess plantarflexion.
- Option to replace posterior strap with anterior/posterior wrap-around strap
- Solid outer foundation provides additional support and heel stabilisation
- Full wrap inner liner made from soft, thin polyethylene plastic allows full alignment control of the heel, mid-foot, and forefoot
- Choice of two outer foundation materials - polyethylene for moderate flexibility or co-poly for firm support

Orthotix Orliman Penguin Plantarflexion AFO Standard

- Dynamic orthosis made of flexible thermoplastic
- Internal, low density thermoplastic (LDPE) covers the back of the leg, enclosing the entire perimeter of the midfoot to ensure correct fit
- More rigid external thermoplastic (PP) provides firm support to control the biomechanical positioning and alignment of the limb
- Hook and loop closure system enhances comfort and fit
- Lightweight with a trimmable hem
- Low profile design is easy to adjust in the shoe
- Includes pads for the toes and the dorsal midfoot

When fitting it is recommended to choose a size that leaves approximately 1cm of space between the end of the orthosis and the foot.

Orthotix Orliman Pelican Hinged AFO

- Controls plantarflexion and toe walking
- Realigns entire foot and supports the medial longitudinal arch
- Facilitates the development of movement patterns for a more natural gait
- Increased control of knee hyperextension
- Ankle angle can be adjusted using posterior screw (Allen key provided)
- Low profile design for ease of accommodation in patient's footwear
- Prefabricated for instant use and sized by simple foot measurement

Beagle Aequi Ankle Junior (Push Ortho)

- Stabilises the ankle joint during inversion as well as eversion and in both neutral and flexed positions
- The shell provides optimal support for the ankle in a simple and comfortable manner
- Diagonal straps made of non-elastic material provide the correct compression
- Molecule symbols helps the wearer to fasten the straps correctly and in the right sequence
- Universal: the brace can be worn on either the left or right side

Beagle Aequi Ankle Junior (Push Ortho)

Size	Product Code
Universal	PUS100B

Beagle Orthomerica Paediatric AFO PLS

- Popular prefabricated design accommodates many patients not requiring a custom or more rigid AFO
- Full range of sizes fits infants 2 months to 6 years
- Low-profile, effective for most indications
- Inexpensive, labour savings for office or clinical application

Beagle Orthomerica Paediatric AFO PLS

Orthotix Derotation Orthosis

- Designed to assist with correction of internal/external rotation of both lower limbs, enabling feet to be in the line of progression during gait
- Consists of a belt and two unidirectional elastic straps featuring silicone pimples for improved anatomical adhesion. Straps apply spiral traction from medial side of the foot to the waist, rotating the tibia, femur and hip in the desired corrective direction
- If internal rotation is required simply swap over the left and right straps for the desired effect

Orthotix Double Derotation Orthosis

Promedics Aspen Paediatric CTO Collar

- Cervical and upper thoracic spinal brace
- Combines highly effective immobilisation of the cervical and upper thoracic spine
- Research has shown increasing immobilisation, going from a stand alone cervical collar to a two-post device and then onto a four-post orthosis
- Offers 'step-down' alteration for ongoing rehabilitation therapy
- Improves comfort and patient compliance
- Unlimited adjustability
- MRI compatible
- Replacement liners available

Body Belt Plus + Osteo Back Plate = Osteo Plus

To make a modular Osteo Plus TLSO solution please choose the appropriate belt and back plate options from the following charts.

MKS® Paediatric Thorecta

Size	Product Code	Body Circumference	Abdominal Height	Height of Back Piece	Product Code
Bambini	582-000NS-S	50 - 60cm	14cm	XXS (34cm)	762-064-S
Junior	582-001NS-S	60 - 70cm	14cm	XS (42cm)	762-065-S

How to measure:

One frontal measurement is required which determines the height of the back part - from the sternal angle (2cm below sterno/clavicular joint) to 2cm above symphysis pubis.

Brace Orthopaedic MKS® Paediatric Thorecta Plus

- Functions according to the 3-Point-Principle
- Adjustable, stable aluminium profiles
- All section parts are padded
- Individual strap course
- Compression padding for the waist
- Additional firm thorax support

MKS® Paediatric Thorecta Plus

Size	Product Code	Body Circumference	Height of Front Piece	Height of Back Piece
Bambini	751E	50 - 70cm	Maximal 34cm	Maximal 38cm
Junior	751D	60 - 80cm	Maximal 40cm	Maximal 48cm

Brace Orthopaedic MKS® Paediatric Osteo Plus

- Functions according to the reclination principle
- Semi-elastic bandaging material
- Lateral reinforcing stays
- Firm abdominal piece with hook and loop fastener
- Adjustable back plate with incorporated aluminium profile
- Individual strap course
- Reclination straps

Body Belt Plus + Osteo Back Plate = Osteo Plus

To make a modular Osteo Plus TLSO solution please choose the appropriate belt and back plate options from the following charts.

MKS® Paediatric Thorecta Plus

Size	Product Code	Body Circumference	Abdominal Height	Height of Back Piece	Product Code
Bambini	582-200NS-S	50 - 60cm	14cm	XXS (34cm)	762-064-S
