

# Avior Package Ordering Guide

**Avior is Blatchford's next-generation microprocessor-controlled knee, that's redefining mobility for lower activity individuals. Perfect for new amputees, Avior delivers stability, safety<sup>1</sup>, and a smooth, natural walking experience, all powered by our groundbreaking biomimetic design philosophy. Then as wearers improve and grow in confidence, Avior evolves with them.**

The NHS England Clinical Commissioning Policy for microprocessor controlled knees means that MPK's can be prescribed to patients at specialist rehabilitation centres. The policy aims to enhance quality of life by improving patient choice of prosthetic componentry based upon individual needs. Blatchford has a range of Avior packages available for NHS clinics in England that enable patients to be prescribed with an Avior MPK plus a range of Blatchford prosthetic feet for a single price, to ensure the best clinical solution for patients with above knee amputation or hip disarticulation.

**Scan the QR code below for more information on Avior. If you are interested in undergoing the Avior training programme please contact your local customer services team on [customer.service@blatchford.co.uk](mailto:customer.service@blatchford.co.uk)**
